### TEACHING MODALITIES

#### FACE-TO-FACE

**PURELY FACE TO FACE**
Instructors and students are physically present in the same space for lecture or section at preset times/days. All instructional materials and assessments are distributed during class.

#### ONLINE

**PURELY ONLINE**
Based on providing the maximum flexibility for students and instructors. Most/all of the work is done independently on a flexible schedule using asynchronous activities and interactions.

**ASYNCHRONOUS**

**SYNCHRONOUS**
Based on maximizing synchronous interactions between class members using a variety of digital communication tools. All students follow the same assessment and activities schedule.

#### HYBRID

More than 50% of the preset face-to-face days/times are replaced by digital instruction and activities, such as readings, pre-recorded video lectures, internet resources, online assessments, video conferences, group work or discussions.

#### BLENDED/WEB-ENHANCED

Face-to-face classes that provide many instructional materials, activities, and/or assessments digitally, usually through a course website.

#### FLIPPED

Face-to-face classes that put much of the explanatory lecture and material online for students to review before in-person class time, during which instructors primarily guide students through active learning activities.
